

Test Case Report

Overview

Organisation: Admin organisation

System: Building Energy Metadata Publisher

Domain: city-energy-data-space city-energy-data-space

Specification: Building Energy Metadata Validation

Actor: Energy Data Provider

Test name: TC03 - API Endpoint and Response Validation (Disabled)

Description: Retained for future live API conformance testing and currently disabled. When enabled, it extracts dcat:endpointURL from uploaded JSON-LD metadata, calls the endpoint with HTTP GET, checks HTTP 200 and application/json, and validates the returned JSON against the API response schema.

Result: **SUCCESS**

Start time: 18/08/2026 01:49:40 **End time:** 18/08/2026 01:49:48

Session ID: bac54aee-0142-4078-b587-500e0cf9e0ca

The declared API endpoint is reachable and its HTTP response conforms to the required JSON contract.

Step reports

[Step 1](#): Upload metadata that declares the API endpoint ✓

[Step 2](#): Check that exactly one API endpoint is declared ✓

[Step 3](#): Call the declared Provider API endpoint ✓

[Step 4](#): Check that the API returns HTTP 200 ✓

[Step 5](#): Check that the API returns application/json ✓

[Step 6](#): Validate the API response against the JSON Schema ✓

Step 1: Upload metadata that declares the API endpoint

[Top](#)

Overview

Date: 18/08/2026 01:49:47

Result: **SUCCESS**

Report data

Select the JSON-LD metadata file containing dcat:endpointURL

[File content]

Step 2: Check that exactly one API endpoint is declared

[Top](#)

Overview

Date: 18/08/2026 01:49:47

Result: **SUCCESS**

Findings: 0 error(s), 0 warning(s), 1 message(s)

Report details

 Metadata declares exactly one API endpoint.

Report data

actual

1.0

expected

1.0

Step 3: Call the declared Provider API endpoint

[Top](#)

Overview

Date: 18/08/2026 01:49:47

Result: **SUCCESS**

Report data

request

method

GET

uri

http://host.docker.internal:8765/mock-api/api-response-valid.json

response

status

200

headers

content-length

426

content-type

application/json

date

Tue, 18 Aug 2026 01:49:47 GMT

last-modified

Mon, 17 Aug 2026 02:22:32 GMT

server

SimpleHTTP/0.6 Python/3.12.8

body

[File content]

Step 4: Check that the API returns HTTP 200

[Top](#)

Overview

Date: 18/08/2026 01:49:47

Result: **SUCCESS**

Findings: 0 error(s), 0 warning(s), 1 message(s)

Report details

 The API returned HTTP 200.

Report data

actual

200.0

expected

200.0

Step 5: Check that the API returns application/json

[Top](#)

Overview

Date: 18/08/2026 01:49:47

Result: **SUCCESS**

Findings: 0 error(s), 0 warning(s), 1 message(s)

Report details

 The API response Content-Type is application/json.

Report data

input

```
application/json
```

expression

```
(?i)^application/json([ ]*;.*)?$
```

Step 6: Validate the API response against the JSON Schema

[Top](#)

Overview

Date: 18/08/2026 01:49:47

Result: SUCCESS

Report data

json
